

Multiobjective optimization & Full-stack development

The Multiobjective Optimization Research Group at MIT is looking for a summer intern interested in:

- Contributing to open source software
- Supporting research making it real life problems
- Full stack web development
- Learning about multiobjective optimization

Thank you for your interest.
The call has ended.

We offer you:

1. A chance to work on interesting research problems

2. A chance to work on interesting research problems

3. A chance to work on interesting research problems

4. A chance to work on interesting research problems

5. A chance to work on interesting research problems

6. A chance to work on interesting research problems

7. A chance to work on interesting research problems

8. A chance to work on interesting research problems

9. A chance to work on interesting research problems

10. A chance to work on interesting research problems

11. A chance to work on interesting research problems

12. A chance to work on interesting research problems
